## Customers → Now Online

Customer Analytic also adds new columns to the grid

**Shopping Type** - this field defines the type of activity for the online customer (browsing, active cart, checkout)

**Country** - display information about the country and the city, a user who came to your site.

**Name** - first and last name of the customer (only for registered customers)

**Cart Value** - the total amount of merchandise added to the shopping cart.

**Qty items** - the total number of items in the shopping cart.

# CONFIGURATION

## Customers → Now Online

Press Refresh button to watch customers in real time

Also merchants can setup interval for Auto Refresh of data about Online Customers.

There are 3 updating options available:

10 seconds, 20 seconds, 30 seconds

The screenshot shows the Magento Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main header is 'Configuration' with a search icon, a notification bell with '10', and a user profile 'admin'. Below the header, there's a 'Store View: Default Config' dropdown and a 'Save Config' button. The left sidebar menu is expanded to 'ELTRINO EXTENSIONS', with 'Customer Analytic' highlighted by a red box. The main content area is titled 'Settings' and contains three sections: 'Check for old data' with a dropdown set to 'Yes' and a note 'Turning on checking for old data in Magento database'; 'List of bots' with an empty text area and a note about User Agent names; and 'List of IPs' with an empty text area and a note about designating bots by IP address.

# CONFIGURATION

Stores → Settings → Configuration → Eltrino Extensions → Customer Analytic → Settings

To set up a proper view of Customers Now Online it's possible to turn on (turn off) checking for old data in Magento database. Fulfill the List of bots (User Agent names) to sift out relevant from irrelevant data.

Fulfill List of IPs - these IP addresses are going to be designated as bots. Both specific IP addresses as well as subnet masks (x.x.x.x/x) can be specified in this list.
