

Region Manager PRO (for Magento 2)

User Guide

To install Region Manager follow next steps:

1. Download Extension package
2. Extract files from the archive
3. To ensure that caching won't make issues during installation process please turn cache off **Cache Management page: System > Cache Management**
4. Run the command line - `php bin/magento cache:clean`
5. Navigate your store root folder in SSH console - `cd path_to_the_store_root_folder`
Run the command line - `bin/magento module:enable Eltrino_Region`
6. Run the command line setup module in Magento 2 - `php bin/magento setup:upgrade`
7. Run the command line compile code - `php bin/magento setup:di:compile`
8. Run the command line deploy static files - `php bin/magento setup:static-content:deploy`
